Ontological Semantics (Language, Speech, and Communication)

Sergei Nirenburg, Victor Raskin

Ontological Semantics (Language, Speech, and Communication) Sergei Nirenburg, Victor Raskin

In *Ontological Semantics*, Sergei Nirenburg and Victor Raskin introduce a comprehensive approach to the treatment of text meaning by computer. Arguing that being able to use meaning is crucial to the success of natural language processing (NLP) applications, they depart from the ad hoc approach to meaning taken by much of the NLP community and propose theory-based semantic methods. Ontological semantics, an integrated complex of theories, methodologies, descriptions, and implementations, attempts to systematize ideas about both semantic description as representation and manipulation of meaning by computer programs. It is built on already coordinated "microtheories" covering such diverse areas as specific language phenomena, processing heuristics, and implementation system architecture rather than on isolated components requiring future integration. Ontological semantics is constantly evolving, driven by the need to make meaning manipulation tasks such as text analysis and text generation work. Nirenburg and Raskin have therefore developed a set of heterogeneous methods suited to a particular task and coordinated at the level of knowledge acquisition and runtime system architecture implementations, a methodology that also allows for a variable level of automation in all its processes. Nirenburg and Raskin first discuss ontological semantics in relation to other fields, including cognitive science and the AI paradigm, the philosophy of science, linguistic semantics and the philosophy of language, computational lexical semantics, and studies in formal ontology. They then describe the content of ontological semantics, discussing text-meaning representation, static knowledge sources (including the ontology, the fact repository, and the lexicon), the processes involved in text analysis, and the acquisition of static knowledge.

From reader reviews:

Juan Higgins:

People live in this new day of lifestyle always aim to and must have the free time or they will get large amount of stress from both day to day life and work. So , whenever we ask do people have free time, we will say absolutely yes. People is human not a robot. Then we question again, what kind of activity have you got when the spare time coming to an individual of course your answer will probably unlimited right. Then ever try this one, reading textbooks. It can be your alternative throughout spending your spare time, typically the book you have read is usually Ontological Semantics (Language, Speech, and Communication).

Ramiro Alvarez:

Ontological Semantics (Language, Speech, and Communication) can be one of your beginning books that are good idea. We recommend that straight away because this reserve has good vocabulary that may increase your knowledge in language, easy to understand, bit entertaining but still delivering the information. The writer giving his/her effort that will put every word into enjoyment arrangement in writing Ontological Semantics (Language, Speech, and Communication) however doesn't forget the main place, giving the reader the hottest along with based confirm resource data that maybe you can be certainly one of it. This great information can certainly drawn you into new stage of crucial considering.

Glenn Bail:

Beside this specific Ontological Semantics (Language, Speech, and Communication) in your phone, it may give you a way to get nearer to the new knowledge or details. The information and the knowledge you are going to got here is fresh from the oven so don't end up being worry if you feel like an old people live in narrow commune. It is good thing to have Ontological Semantics (Language, Speech, and Communication) because this book offers to you readable information. Do you sometimes have book but you would not get what it's interesting features of. Oh come on, that won't happen if you have this within your hand. The Enjoyable option here cannot be questionable, such as treasuring beautiful island. Techniques you still want to miss that? Find this book and read it from at this point!

Mark Nixon:

As we know that book is significant thing to add our understanding for everything. By a publication we can know everything you want. A book is a range of written, printed, illustrated or maybe blank sheet. Every year was exactly added. This publication Ontological Semantics (Language, Speech, and Communication) was filled in relation to science. Spend your time to add your knowledge about your science competence. Some people has distinct feel when they reading the book. If you know how big advantage of a book, you can truly feel enjoy to read a guide. In the modern era like currently, many ways to get book you wanted.
