Guide to Information Sources in Mathematics and Statistics (Reference Sources in Science and Technology) Martha A. Tucker, Nancy D. Anderson

This book is a reference for librarians, mathematicians, and statisticians involved in college and research level mathematics and statistics in the 21st century. We are in a time of transition in scholarly communications in mathematics, practices which have changed little for a hundred years are giving way to new modes of accessing information. Where journals, books, indexes and catalogs were once the physical representation of a good mathematics library, shelves have given way to computers, and users are often accessing information from remote places. Part I is a historical survey of the past 15 years tracking this huge transition in scholarly communications in mathematics. Part II of the book is the bibliography of resources recommended to support the disciplines of mathematics and statistics. These are grouped by type of material. Publication dates range from the 1800's onwards. Hundreds of electronic resources-some online, both dynamic and static, some in fixed media, are listed among the paper resources. Amazingly a majority of listed electronic resources are free.

From reader reviews:

Benjamin Holmes:

The reserve with title Guide to Information Sources in Mathematics and Statistics (Reference Sources in Science and Technology) possesses a lot of information that you can discover it. You can get a lot of benefit after read this book. This book exist new information the information that exist in this publication represented the condition of the world now. That is important to yo7u to learn how the improvement of the world. This book will bring you inside new era of the globalization. You can read the e-book on the smart phone, so you can read it anywhere you want.

Margaret Cardwell:

A lot of people always spent their free time to vacation or maybe go to the outside with them friends and family or their friend. Do you know? Many a lot of people spent they free time just watching TV, or perhaps playing video games all day long. If you need to try to find a new activity that's look different you can read the book. It is really fun for you. If you enjoy the book that you simply read you can spent the entire day to reading a e-book. The book Guide to Information Sources in Mathematics and Statistics (Reference Sources in Science and Technology) it is very good to read. There are a lot of individuals who recommended this book. These were enjoying reading this book. Should you did not have enough space bringing this book you can buy the particular e-book. You can m0ore very easily to read this book from your smart phone. The price is not to fund but this book provides high quality.

Stella Carpenter:

You can find this Guide to Information Sources in Mathematics and Statistics (Reference Sources in Science and Technology) by look at the bookstore or Mall. Simply viewing or reviewing it could possibly to be your solve issue if you get difficulties on your knowledge. Kinds of this reserve are various. Not only through written or printed but also can you enjoy this book by e-book. In the modern era like now, you just looking by your local mobile phone and searching what their problem. Right now, choose your current ways to get more information about your book. It is most important to arrange yourself to make your knowledge are still upgrade. Let's try to choose suitable ways for you.

Herbert Knight:

A lot of people said that they feel fed up when they reading a book. They are directly felt it when they get a half elements of the book. You can choose typically the book Guide to Information Sources in Mathematics and Statistics (Reference Sources in Science and Technology) to make your current reading is interesting. Your own skill of reading skill is developing when you just like reading. Try to choose very simple book to make you enjoy you just read it and mingle the impression about book and studying especially. It is to be very first opinion for you to like to available a book and study it. Beside that the e-book Guide to Information Sources in Mathematics and Statistics (Reference Sources in Science and Technology) can to be

a newly purchased friend when you're really feel alone and confuse in doing what must you're doing of that time.
