Family Art Therapy is designed to help the reader incorporate clinical art therapy intervention techniques into family therapy practice. Expressive modalities are often used in work with families, particularly visual art forms, and there is already considerable evidence and literature that point to a positive link between the two. This text is unique in that it draws together, for the first time in a single volume, an overview of the evolution of the theories and techniques from the major schools of classic family therapy, integrating them with practical clinical approaches from the field of art therapy.
