Group Technology and Cellular Manufacturing: A State-of-the-Art Synthesis of Research and Practice

Group Technology and Cellular Manufacturing (GT/CM) have been widely-researched areas in the past 15 years and much progress has been made in all branches of GT/CM. Resulting from this research activity has been a proliferation of techniques for part-machine grouping, engineering data bases, expert system-based design methods for identifying part families, new analytical and simulation tools for evaluating performance of cells, new types of cell incorporating robotics and flexible automation, team-based approaches for organizing the work force and much more; however, the field lacks a careful compilation of this research and its outcomes. The editors of this book have commissioned leading researchers and implementers to prepare specific treatments of topics for their special areas of expertise in this broad-based philosophy of manufacturing. The editors have sought to be global both in coverage of topic matters and contributors. *Group Technology and Cellular Manufacturing* addresses the needs and interests of three groups of individuals in the manufacturing field: academic researchers, industry practitioners, and students. (1) The book provides an up-to-date perspective, incorporating the advances made in GT/CM during the past 15 years. As a natural extension to this research, it synthesizes the latest industry practices and outcomes to guide research to greater real-world relevance. (2) The book makes clear the foundations of GT/CM from the core elements of new developments which are aimed at reducing developmental and manufacturing lead times, costs, and at improving business quality and performance. (3) Finally, the book can be used as a textbook for graduate students in engineering and management for studying the field of Group Technology and Cellular Manufacturing.

From reader reviews:

George Clark:

Reading a publication tends to be new life style within this era globalization. With studying you can get a lot of information that will give you benefit in your life. Using book everyone in this world may share their idea. Ebooks can also inspire a lot of people. Many author can inspire their own reader with their story or perhaps their experience. Not only the story that share in the textbooks. But also they write about advantage about something that you need case in point. How to get the good score toefl, or how to teach children, there are many kinds of book that you can get now. The authors these days always try to improve their proficiency in writing, they also doing some study before they write for their book. One of them is this Group Technology and Cellular Manufacturing: A State-of-the-Art Synthesis of Research and Practice.

Mark Clark:

Reading can called brain hangout, why? Because when you find yourself reading a book particularly book entitled Group Technology and Cellular Manufacturing: A State-of-the-Art Synthesis of Research and Practice your mind will drift away trough every dimension, wandering in every aspect that maybe unknown for but surely will end up your mind friends. Imaging every single word written in a guide then become one contact form conclusion and explanation in which maybe you never get before. The Group Technology and Cellular Manufacturing: A State-of-the-Art Synthesis of Research and Practice giving you a different experience more than blown away your head but also giving you useful data for your better life in this era. So now let us present to you the relaxing pattern is your body and mind is going to be pleased when you are finished reading it, like winning a sport. Do you want to try this extraordinary shelling out spare time activity?

Patricia Oyler:

This Group Technology and Cellular Manufacturing: A State-of-the-Art Synthesis of Research and Practice is brand-new way for you who has curiosity to look for some information as it relief your hunger info. Getting deeper you in it getting knowledge more you know or you who still having tiny amount of digest in reading this Group Technology and Cellular Manufacturing: A State-of-the-Art Synthesis of Research and Practice can be the light food for yourself because the information inside this specific book is easy to get by means of anyone. These books build itself in the form which can be reachable by anyone, yes I mean in the e-book form. People who think that in reserve form make them feel sleepy even dizzy this e-book is the answer. So there is no in reading a guide especially this one. You can find what you are looking for. It should be here for anyone. So , don't miss that! Just read this e-book kind for your better life along with knowledge.

Daniel Watkins:

Reading a publication make you to get more knowledge from the jawhorse. You can take knowledge and information from a book. Book is created or printed or descriptive from each source that filled update of

news. In this particular modern era like now, many ways to get information are available for you actually. From media social just like newspaper, magazines, science reserve, encyclopedia, reference book, fresh and comic. You can add your understanding by that book. Do you want to spend your spare time to open your book? Or just looking for the Group Technology and Cellular Manufacturing: A State-of-the-Art Synthesis of Research and Practice when you required it?
