Nanosystems: Molecular Machinery, Manufacturing, and Computation

K. Eric Drexler

Nanosystems: Molecular Machinery, Manufacturing, and Computation K. Eric Drexler

"Devices enormously smaller than before will remodel engineering, chemistry, medicine, and computer technology. How can we understand machines that are so small? *Nanosystems* covers it all: power and strength, friction and wear, thermal noise and quantum uncertainty. This is the book for starting the next century of engineering." - Marvin Minsky

MIT Science magazine calls Eric Drexler "Mr. Nanotechnology." For years, Drexler has stirred controversy by declaring that molecular nanotechnology will bring a sweeping technological revolution - delivering tremendous advances in miniaturization, materials, computers, and manufacturing of all kinds. Now, he's written a detailed, top-to-bottom analysis of molecular machinery - how to design it, how to analyze it, and how to build it. *Nanosystems* is the first scientifically detailed description of developments that will revolutionize most of the industrial processes and products currently in use.

This groundbreaking work draws on physics and chemistry to establish basic concepts and analytical tools. The book then describes nanomechanical components, devices, and systems, including parallel computers able to execute 1020 instructions per second and desktop molecular manufacturing systems able to make such products. Via chemical and biochemical techniques, proximal probe instruments, and software for computer-aided molecular design, the book charts a path from present laboratory capabilities to advanced molecular manufacturing. Bringing together physics, chemistry, mechanical engineering, and computer science, *Nanosystems* provides an indispensable introduction to the emerging field of molecular nanotechnology.

From reader reviews:

Margert Lewis:

In this 21st millennium, people become competitive in every way. By being competitive at this point, people have to do something to make all of them survive, being in the middle of the actual crowded place and notice through surrounding. One thing that at times many people have underestimated that for a while is reading. Yeah, by reading a publication your ability to survive rises then having a chance to stand up than others is high. For you personally who want to start reading any book, we give you this *Nanosystems: Molecular Machinery, Manufacturing, and Computation* book as basic and daily reading reserve. Why, because this book is usually more than just a book.

Ilene Cody:

The guide titled *Nanosystems: Molecular Machinery, Manufacturing, and Computation* is the publication that is recommended to you to see. You can see the quality of the e-book content that will be shown to an individual. The language that the author uses to explain their ideas is easy to understand. The copywriter did a lot of investigation when writing the book, therefore the information that they share to you is absolutely accurate. You also might get the e-book of *Nanosystems: Molecular Machinery, Manufacturing, and Computation* from the publisher to make you much more enjoy free time.

Shirley Akins:

Are you kind of stressful person, only have 10 or perhaps 15 minutes in your time to upgrading your mind ability or thinking skill possibly analytical thinking? Then you are experiencing a problem with the book compared to can't satisfy your short space of time to read it because this time you only find a guide that needs more time to go through. *Nanosystems: Molecular Machinery, Manufacturing, and Computation* can be your answer because it can be read by a person who has those short free time problems.

William Glover:

Guide is one of the sources of expertise. We can add our information from it. Not only for students but native or citizen will need a book to know the change in information of year to year. As we know those books have many advantages. Besides we add our knowledge, can bring us to around the world. Through the book *Nanosystems: Molecular Machinery, Manufacturing, and Computation* we can have more advantage. Don't you to definitely be creative people? For being a creative person must choose to read a book. Just choose the best book that is suitable with your aim. Don't end up being doubtful to change your life by this book *Nanosystems: Molecular Machinery, Manufacturing, and Computation*. You can be more inviting than now.
