Protein-Ligand Interactions: Methods and Applications (Methods in Molecular Biology)

Protein-Ligand Interactions: Methods and Applications (Methods in Molecular Biology)

A readily reproducible collection of established and emerging techniques for studying the interaction between proteins and ligands, including biochemical/bulk techniques, structure analysis, spectroscopy, single-molecule studies, and theoretical/computational tools. Among the highlights are surface plasmon resonance (SPR) and reflectometric biosensor approaches, high-throughput screening with confocal optics microscopy, single molecule fluorescence and fluorescence correlation spectroscopy (FCS), atomic force microscopy (AFM), crystallography of reaction intermediates, and time-resolved x-ray crystallography. The protocols follow the successful Methods in Molecular Biology™ series format, each offering step-by-step laboratory instructions, an introduction outlining the principle behind the technique, lists of the necessary equipment and reagents, and tips on troubleshooting and avoiding known pitfalls.

From reader reviews:

Sylvia Johnson:

What do you think about book? It is just for students because they are still students or the item for all people in the world, the particular best subject for that? Only you can be answered for that query above. Every person has distinct personality and hobby for each and every other. Don't to be pressured someone or something that they don't want do that. You must know how great and also important the book Protein' Ligand Interactions: Methods and Applications (Methods in Molecular Biology). All type of book are you able to see on many solutions. You can look for the internet resources or other social media.

Louise Richards:

Spent a free the perfect time to be fun activity to accomplish! A lot of people spent their leisure time with their family, or their particular friends. Usually they accomplishing activity like watching television, likely to beach, or picnic in the park. They actually doing same thing every week. Do you feel it? Do you want to something different to fill your own free time/ holiday? Might be reading a book is usually option to fill your cost-free time/ holiday. The first thing you will ask may be what kinds of guide that you should read. If you want to try out look for book, may be the e-book untitled Protein' Ligand Interactions: Methods and Applications (Methods in Molecular Biology) can be good book to read. May be it could be best activity to you.

Mitchell Diaz:

In this time globalization it is important to someone to acquire information. The information will make a professional understand the condition of the world. The fitness of the world makes the information simpler to share. You can find a lot of references to get information example: internet, newspapers, book, and soon. You will observe that now, a lot of publisher in which print many kinds of book. The book that recommended for your requirements is Protein' Ligand Interactions: Methods and Applications (Methods in Molecular Biology) this e-book consist a lot of the information with the condition of this world now. This particular book was represented just how can the world has grown up. The language styles that writer require to explain it is easy to understand. The actual writer made some research when he makes this book. This is why this book suited all of you.

William Powell:

What is your hobby? Have you heard in which question when you got students? We believe that that concern was given by teacher for their students. Many kinds of hobby, Everyone has different hobby. Therefore you know that little person including reading or as examining become their hobby. You must know that reading is very important and book as to be the point. Book is important thing to incorporate you knowledge, except your own personal teacher or lecturer. You will find good news or update about something by book. A substantial number of sorts of books that can you take to be your object. One of them is Protein' Ligand

Interactions: Methods and Applications (Methods in Molecular Biology).
