**Mathematics, Magic and Mystery (Dover Recreational Math)** Martin Gardner

Why do card tricks work? How can magicians do astonishing feats of mathematics mentally? Why do stage "mind-reading" tricks work? As a rule, we simply accept these tricks and "magic" without recognizing that they are really demonstrations of strict laws based on probability, sets, number theory, topology, and other branches of mathematics.

This is the first book-length study of this fascinating branch of recreational mathematics. Written by one of the foremost experts on mathematical magic, it employs considerable historical data to summarize all previous work in this field. It is also a creative examination of laws and their exemplification, with scores of new tricks, insights, and demonstrations. Dozens of topological tricks are explained, and dozens of manipulation tricks are aligned with mathematical law.

Nontechnical, detailed, and clear, this volume contains 115 sections discussing tricks with cards, dice, coins, etc.; topological tricks with handkerchiefs, cards, etc.; geometrical vanishing effects; demonstrations with pure numbers; and dozens of other topics. You will learn how a Moebius strip works and how a Curry square can "prove" that the whole is not equal to the sum of its parts.

No skill at sleight of hand is needed to perform the more than 500 tricks described because mathematics guarantees their success. Detailed examination of laws and their application permits you to create your own problems and effects.

### **From reader reviews:**

#### **Ernie Swisher:**

Mathematics, Magic and Mystery (Dover Recreational Math) can be one of your beginning books that are good idea. All of us recommend that straight away because this guide has good vocabulary which could increase your knowledge in language, easy to understand, bit entertaining but still delivering the information. The writer giving his/her effort to get every word into pleasure arrangement in writing Mathematics, Magic and Mystery (Dover Recreational Math) although doesn't forget the main stage, giving the reader the hottest and based confirm resource facts that maybe you can be considered one of it. This great information may drawn you into brand new stage of crucial pondering.

#### **Harold Walsh:**

Can you one of the book lovers? If yes, do you ever feeling doubt if you find yourself in the book store? Attempt to pick one book that you find out the inside because don't evaluate book by its cover may doesn't work here is difficult job because you are frightened that the inside maybe not while fantastic as in the outside seem likes. Maybe you answer could be Mathematics, Magic and Mystery (Dover Recreational Math) why because the great cover that make you consider with regards to the content will not disappoint you. The inside or content is actually fantastic as the outside or maybe cover. Your reading 6th sense will directly guide you to pick up this book.

#### **Mary Banks:**

You may spend your free time to learn this book this guide. This Mathematics, Magic and Mystery (Dover Recreational Math) is simple to develop you can read it in the playground, in the beach, train along with soon. If you did not have much space to bring the printed book, you can buy the actual e-book. It is make you quicker to read it. You can save the particular book in your smart phone. Consequently there are a lot of benefits that you will get when you buy this book.

#### **John Hawkins:**

What is your hobby? Have you heard that will question when you got scholars? We believe that that query was given by teacher with their students. Many kinds of hobby, Everybody has different hobby. So you know that little person such as reading or as looking at become their hobby. You need to know that reading is very important and also book as to be the thing. Book is important thing to provide you knowledge, except your teacher or lecturer. You see good news or update about something by book. Many kinds of books that can you decide to try be your object. One of them is niagra Mathematics, Magic and Mystery (Dover Recreational Math).
