The Dawn of Innovation: The First American Industrial Revolution

Charles R. Morris

The Dawn of Innovation: The First American Industrial Revolution Charles R. Morris

In the first few decades of the nineteenth century, America went from being a largely rural economy, with little internal transportation infrastructure, to a fledgling industrial powerhouse—setting the stage for the vast fortunes that would be made in the golden age of American capitalism. In *The Dawn of Innovation*, Charles R. Morris vividly brings to life a time when three stupendous American innovations—universal male suffrage, the shift of political power from elites to the middle classes, and a broad commitment to mechanized mass-production—gave rise to the world’s first democratic, middle-class, mass-consumption society, a shining beacon to nations and peoples ever since. Behind that ideal were the machines, the men, and the trading and transportation networks that created a new, world-class economic power.
