Through its proven methodology that entails "thinking" then "observing and inferring" and finally "confirming," the program skillfully encourages students to discover for themselves how the language works. Multiple layers of meaning are uncovered and, as a result, students develop critical-thinking skills that empower them to take control of their own learning. What they acquire in this manner is stored in long-term memory, moving students more rapidly through the material and facilitating faster development of proficiency. In the ENHANCED fourth edition, the integration of iLrn™: Heinle Learning Center enhances this active-learning approach.
