**How to Teach Relativity to Your Dog** Chad Orzel

**They say you can't teach an old dog new tricks. But what about relativity?**

Physics professor Chad Orzel and his inquisitive canine companion, Emmy, tackle the concepts of general relativity in this irresistible introduction to Einstein's physics. Through armchair—and sometimes passenger-seat—conversations with Emmy about the relative speeds of dog and cat motion or the logistics of squirrel-chasing, Orzel translates complex Einsteinian ideas—the slowing of time for a moving observer, the shrinking of moving objects, the effects of gravity on light and time, black holes, the Big Bang, and of course,  $E=mc^2$ —into examples simple enough for a dog to understand.

A lively romp through one of the great theories of modern physics, *How to Teach Relativity to Your Dog* will teach you everything you ever wanted to know about space, time, and anything else you might have slept through in high school physics class.
